

Cooling Systems Division

Nobumasa Kodama

The main focus of work in the Cooling Systems Division in 1996 ranged from new product development, conformance with European safety requirements and development of new applications:

- (1) The Sanyo Denki's AC fan and BLDC fan acquired the TÜV safety certification in order to meet European safety standards.
- (2) The AC fan acquired the CE mark in compliance with European directives.
- (3) A new 140 sq. × 38 mm Long Life Fan was developed.
- (4) A new Water Protected Fan was developed for outdoor equipment.
- (5) "SAN ACE MC" won a good design award.

Acquisition of major European safety certification and the development of new, ultra reliable products will open up new sales opportunities and enlarge their scope of application.

■ TÜV Certification and CE Marking

■ 140 sq. × 38 mm Long Life Fan

■ Water Protected Fan

■ "SAN ACE MC" Awarded with "G" (Good Design) Mark
